Experience

SOFTWARE QUALITY ASSURANCE ENGINEER | MEDTEL.COM | OCTOBER 2022 - MAY 2023

- Designed test automation features to validate user inputs such as create (POST), update (PATCH), and remove (DELETE)
- Found, reported, and documented any backend bugs to ensure a quality product for the customer
- Learned the process of Unit Testing and the use of technologies such as **Postman, Cucumber/Selenium**

Personal Projects

PERSONAL PORTFOLIO | REACT.JS | https://audiimer.github.io/new-portfolio

- Designed a new portfolio from scratch using React.js, showcasing personal projects and achievements
- Implemented responsive design principles to ensure optimal user experience across various devices
- Utilized React.js components and state management for seamless navigation and content rendering

VENDING MACHINE | HTML, CSS, JAVASCRIPT | https://audiimer.github.io/vending-machine

- Created a visually appealing user interface with dynamic product displays and user-friendly controls
- Implemented a product inventory system, allowing users to select from a variety of items with corresponding prices
- Implemented PIN verification logic, deducting the user's wallet balance for selected products and displaying appropriate error messages for mismatches or insufficient balance

TODO LIST | REACT.JS | https://audiimer.github.io/todo-list-react

- Developed a Todo List application that allows user to add and remove items from the list
- Applied CSS for styling to enhance the application's visual appeal and ensure a modern and clean design
- Published the application on GitHub, contributing to the open-source community and showcasing coding skills and collaboration abilities
